

Written and composed by Adam and Jessica Kelly

I believe yes I am loved

Every night you love me
I believe again
Then you whisper softly
This can never end
Though your faith is touching
Can you truly know
When we pass from this life
Where we both shall go

I'm here sweating buckets of fear
What comes yonder what is waiting
Free minds or a singular line
Is there something or illusion

I believe yes I am loved
All the way, all the way
I believe that life is love
All the way, all the way

Headlines there are cynical minds
Screaming we're not more than muscle
Look here at a nation in fear
Pounded spirit raped of freedom

While our hearts still beat dear
Tell me once again
That there's something out there
After our lives end

Will we be together
Will we be at all
Love me to remind me
To face death standing tall
